AMENDMENTS TO THE SPECIFICATION

This listing of amended paragraphs will replace all prior versions of the paragraphs in the application:

Please replace the paragraph bridging pages 10 (line 28) and 11 (line 4) of the specification with the following amended paragraph:

-- Additionally, it should be understood that one skilled in the field may make appropriate selections for the substituents for the aryl, cycloalkyl, heterocyclo, and heteroaryl groups to provide stable compounds and compounds useful as pharmaceutically-acceptable compounds and/or intermediate compounds useful in making pharmaceutically-acceptable compounds. Thus, for example, in compounds of formula (I), when **Z** ~~**B**~~ is a cyclopropyl ring, preferably the ring has no more than two substituents, and preferably said substituents do not comprise nitro (NO_2), more than one cyano group, or three halogen groups. Similarly, when *m* is 3, preferably R_6, the substituents on the phenyl ring A, are not all nitro, and so forth. --
